

# A10 Writing 1: Results & Discussion

This form should be used to record the marks for the A10 lab assignment. This form should be completed by the student and countersigned by the tutor following the self-assessment. Please give a mark out of 5 against each criterion and a short sentence or two giving the justification for that mark. This will be used to inform the self-reflection component of the next writing assignment, so should include areas for improvement and development.

Breakdown		Mark	Justification and areas for improvement
I: Results	A	4	Have summary graph, with <del>error</del> range bars.
	B	4	Use bullet points, and related circuit diagram, described the operations and parameters of the experiment. Would be better if put some graphs of the waveform (raw data)
	C	3.5	Have descriptions about set of data, but <del>can</del> still can write more to <del>descrip</del> describe the relationships more clear.
	D	4	There are only bullet points, no paragraphs. Grammar is simple, and no misspelled words.
II: Discussion	A	3	Kind of described the analysis progress, but is not clear, and data are not presented clear as well.
	B	3	Conclusions are at the end of the report, and there are some evidence shown, but the conclusion itself is not clear.
	C	2	Wrote too less, and <del>cont</del> topic jumps suddenly, make it difficult to follow, no clear logical process.
	D	2	Only a few simple bullet points, <del>no</del> paragraphs. Should be some detailed sentences and paragraphs describe to the progress of analysis.
Total		25.5
